

Team Rules and Violation Consequences

SolarLink 7 · THM × CESI

The team has agreed the following rules to maintain effective collaboration across two locations and academic calendars. Consequences are internal and constructive: the goal is mutual accountability, not punishment.

Rules

1. Reply within 24 hours on Discord and WhatsApp during weekdays.
2. Deadlines are a commitment. Flag any risk of slippage at least 48 hours before the due date.
3. If a teammate is unavailable, others from their site step in to keep the work moving.
4. Active participation is expected from every member at every scheduled meeting.
5. Notify the team via WhatsApp at least 24 hours in advance if you cannot attend a scheduled meeting.
6. All technical work — firmware, designs, documents — is committed to the shared GitHub repository or shared Google Drive. No work lives only on a local machine.
7. When a non-trivial assembly or firmware issue is solved, the solver records a short, guided video and shares it on Discord, so the other site benefits without a synchronous call.

Violation Consequences (Escalation Path)

8. The issue is raised in the team group on Discord or at the weekly meeting.
9. If unresolved, it is escalated by the local communicator to the other site's communicator.
10. If still unresolved, the two communicators jointly escalate to the supervisors (Prof. Arndt at THM and Prof. Costelle at CESI).

Specific Consequences

- Unannounced absence from a scheduled meeting: catch-up reading of the minutes; second occurrence within two weeks is raised at the next steering meeting.
- Missed individual deadline: 24-hour grace period; if unrecovered, the task is reassigned by the communicators, and the slip is recorded in the risk log.
- Repeated rule breaches: escalated to supervisors as per the escalation path above.
